PROFESSIONAL SUMMARY

React Native Developer with 3.4 years of experience in building scalable, high-performance mobile applications for iOS and Android using **React Native, JavaScript, Node.js**, and **PostgreSQL**. Strong expertise in **Reanimated, Redux, REST API development**, and mobile performance optimization, delivering secure, responsive, and production-grade fintech and enterprise solutions. Proven ability to **design full-stack features, integrate real-time services**, and collaborate closely with backend and product teams to ship reliable applications.

SKILLS

- **Frontend (Mobile & Web):** React Native, React.js, JavaScript (ES6+), Redux, Context API, React Navigation, Tailwind CSS.
- **Backend & APIs :** Node.js, Express.js, REST APIs, JWT Authentication.
- **Database:** SQL(PostgreSQL, MySQL).
- **Cloud & Services:** Firebase (FCM), OTA Updates.
- **Animations & Performance:** React Native Reanimated, React Native Skia.
- **Tools :** VSCode, Git, GitHub, Bitbucket, Jira, Postman, CI/CD Pipelines.

EXPERIENCE

Software Engineer

ValueFloat Technologies Pvt Ltd. (Floatr) — Bangalore, KA.

(March 2024 – Present)

- **Engineered and maintained a production-scale** fintech mobile application using React Native, supporting **thousands of active users across Android and iOS platforms**.
- **Architected and integrated** secure server-side **APIs** to enable financial workflows including **KYC, NPS, and digital gold/silver investments**, ensuring reliable and compliant transaction handling.
- Modernized the mobile application by upgrading from **React Native 0.64 → 0.82**, resolving deprecated dependencies and improving long-term maintainability.
- **Mentored interns in React Native and JavaScript**, guiding them through end-to-end mobile app development, **best practices**, and **production-ready coding standards** to accelerate team productivity.
- **Delivered coupons and rewards system** across both **frontend and Node.js backend**, enabling promotional campaigns and transaction-based incentives that increased feature adoption by **30%+**.
- Deployed **Firebase Cloud Messaging (FCM)** to deliver real-time notifications and offers alerts.
- Implemented **Over-The-Air (OTA) updates**, reducing bug-fix deployment time from days to hours and **accelerating feature rollouts**.
- Collaborated with backend and QA teams to enhance error handling, stabilize APIs, and **reduce production issues by 40%+** during release cycles.

Associate Software Engineer

ValueFloat Technologies Pvt Ltd (Floatr) — Bangalore, India

Mar 2023 – Mar 2024

- **Developed reusable React Native components**, improving development speed and UI consistency.
- **Introduced ESLint-based code quality enforcement**, establishing consistent coding standards, reducing runtime bugs, and improving long-term maintainability.
- Integrated **payment gateways** such as **Billdesk**, **Razorpay**, and **Cashfree** for secure investment and **auto-pay transactions**.
- Built **financial calculators** (SIP, retirement planning, insurance, income tax, and budgeting) to enhance users financial knowledge.
- **Implemented server-side logging and API monitoring** to track request failures, error rates, and response times, enabling faster debugging and improved production system reliability.
- **Integrated Firebase Crashlytics for real-time error monitoring**, enabling faster root-cause analysis and reducing production crash impact.

PERSONAL PROJECTS

SkillGig – Learning & Progress Tracking App

Tech Stack: React Native, Node.js, JavaScript, PostgreSQL

- Built a personalized learning platform where students select **interest-based roadmaps** to start guided learning paths.
- Developed **assignment and notes modules**, enabling secure note **downloads** and **assignment uploads** within the app.
- Implemented **progress tracking, learning streaks, quizzes, and challenges** to drive engagement and reward top-performing students.
- Designed a **gamified leaderboard and winner system** to boost motivation and continuous learning.

Expense Tracker App

Tech Stack: React Native, Express, PostgreSQL

- Built a mobile application to **track daily expenses** with **secure authentication** and structured storage of user data and transactions.
- Implemented **category-wise analytics** and **interactive charts** to provide clear insights into user spending patterns.
- **Architected RESTful APIs and optimized database queries** to ensure fast transaction retrieval and reliable data persistence.

To-Do List App

Tech Stack: React Native, JavaScript

- Developed a **task management application** with features for creating, completing, and deleting tasks to support efficient daily planning.
- Integrated **local storage** to persist user data, ensuring tasks remain available across app sessions.
- Focused on **clean UI design** and **smooth user interactions** for an improved mobile experience.

EDUCATION

Bachelor of Technology in Electronics and Telecommunication Engineering

Sir M Visveswaraya Institute Of Technology, Bangalore

2018 – 2022

CGPA: 8.0/10
